

GIS Specialist Job Description

Pointmap creates customized maps, technical drawings, and report figures for engineers, geologists, and scientists working in the civil, environmental, agricultural and geotechnical industries. We are looking for highly-motivated candidates that enjoy problem-solving and creating quality map output. The work involves simultaneously coordinating and managing multiple projects and tasks that frequently require a quick turnaround.

If you love drafting and making maps, thrive in a supportive learning work environment, and enjoy a fast-paced workday; you might be a good fit for POINTMAP.

Responsibilities Include:

- Utilize ArcGIS Desktop to prepare: maps, drawings, figures, and details
- Proficient with Microsoft Office - Word, Outlook, Excel
- Follow Pointmap best practices in conjunction with industry and clients' standards
- Maintain detailed electronic records of time and actions
- Manage and prioritize projects both self-directed and assigned

Minimum Qualifications:

- Excellent written and verbal communication skills
- BS or BA in environmental science, geography, or similar
- Skilled in the use of ArcGIS Desktop (Spatial Analyst a plus)
- Strong ability to work independently and collaboratively
- Willingness to learn AutoCAD
- Self-motivated, client-focused, integrity-driven work ethic
- Strong problem solving and organizational skills
- Ability to thrive in a fast-paced environment
- Willingness to work independently and collaboratively

**Resume and cover letter highlighting relevant experience
should be sent to info@pointmap.com.**
