

Extend Your Team by Incorporating Ours

Customized technical drawings & maps for environmental planning, remediation, construction, and regulatory compliance to support **ENGINEERS, GEOLOGISTS, AND SCIENTISTS**

WHO Pointmap helps engineers, geologists, and scientists protect and restore the environment. The CAD operators and GIS specialists at Pointmap create customized maps, technical drawings, report figures, and presentation materials that convey technical data and information. Since 1993 Pointmap has been supporting the agricultural, environmental, and geotechnical industries. Pointmap works with state and local government agencies, public and private corporations, engineering and consulting firms, contractors, and developers.

HOW Pointmap can be your sole CAD and GIS service department or assist your in-house staff. We can be there to help when your team is overloaded, on vacation, or committed to another project. We can follow your company standards or help you establish standards for consistency and accuracy. We are committed to making your project a success – with aesthetic map and quality drafting solutions. E-mail CAD & GIS requests to pointmap@pointmap.com.

WHY At Pointmap our focus is on drafting and making maps – it's what we do! We're fast, efficient, and reliable. You collect the analytical data and we'll make it presentable. Pointmap is a full-service AutoCAD and ArcGIS company. Using Autodesk® and Esri® products we manage the acquisition of online data along with your survey and site plans. To help you maximize your time and budget, we can also draft cross sections from boring and well logs, create contours in Surfer or Spatial Analyst, and work directly with your data in a spreadsheet format.

SERVICE You can count on Pointmap for sensible solutions, quality work, and timely turnaround. We are dedicated to working efficiently with you, as if we were just down the hall. You will have our full attention. No task is too big or too small. We can manage the CAD and GIS portion of your project so you can focus on higher billable tasks and more projects - for greater profitability. We listen carefully and ask questions when necessary to insure we deliver a final product that aligns with your objectives. When you speak, we listen!

SUPPORT Over the years, Pointmap has had the honor of working on a large variety of projects for a select group of clients. Over 90% of our business is repeat and referral. People trust Pointmap because we deliver solutions that improve the drafting and mapping portion of your project. We'd like the opportunity to hear about your CAD and GIS needs to determine if we can help.
